

Outstanding Cleaning Worker - Omery Tanner III

In the beauty of Park City, Utah, during the 2018 Simon Institute Symposium, the annual gathering for Custodial and Facility Management professionals, we have celebrated the hard work and professionalism of several cleaning workers that every day clean the buildings and offices in which we work.

Among the many Outstanding Cleaning Workers there was our Outstanding Cleaning Worker: Omery Tanner III!

When Omery heard that LAHH had an opening for a custodian at the USCG Base, he applied for the position immediately. We were concerned that not having a driving license or having a way to get to the Base would be too big of a challenge to overcome. A few days later, on Saturday morning, Omery called and said, "I am riding my bicycle to the Base....I am close but I cannot cross the bridge by bike...but I still going to work there." We were so surprised

and very moved by him! In working with ACCESS, Omery found a way to and from work and now works at the USCG Base. He never gives up!

This never-give-up-attitude is a richness in his life and in ours! He is certain of being loved and belonging to a team, and this makes all the difference! **Congratulations to Omery on being an outstanding cleaning worker!**
