

...and Certification Program started!

The 2018 Vacuum Specialist Certification program has started at LAHH on August 1st! What a great moment for all of us!

Antony during class

Twelve (12) Custodial Specialists have enrolled and with great enthusiasm joined the in-depth training program to become Certified in Vacuum Specialist through the (OSI) team cleaning process! I started the class asking to the participants “What do you expect out of this class?” Beautiful and very meaningful answers were given, reminding to all of us how often we take for granted the meaning and importance of education.

“I want to know the meaning of the work and the tools I use every day”, “I want to learn more about my work to do it better”, “I want to learn more so that I can grow in my profession and have a great career”, “I want to know and learn about the history of the vacuum”!

What a richness of humanity and curiosity about work and life we have witnessed!! Humbly, we want to take on the challenge these questions brings to our work. We believe that the more knowledge we gain the more opportunities will

open up to allow us to achieve better possibilities in career and personal growth! **Let's begin this new adventure!**
